

# Sai Krishna

Senior Frontend Engineer | React.js | TypeScript | Next.js | Micro Frontends

Hyderabad, India | +91 8008663728 | saikrshs184@gmail.com | linkedin.com/in/sai-krishna-b14804249

Open to International Relocation

## SUMMARY

Senior Frontend Engineer with 5+ years of experience building scalable, production-grade web applications using React.js and TypeScript across healthcare, AI-enabled, and enterprise SaaS platforms. Experienced in frontend architecture, microfrontend systems built with Webpack Module Federation, performance optimization, API integration, and reusable component design. Owns frontend delivery across multi-portal, multi-tenant healthcare platforms and AI-powered testing products, collaborating closely with backend and product teams from development through production.

## TECHNICAL SKILLS

|                       |                                                                                                         |
|-----------------------|---------------------------------------------------------------------------------------------------------|
| Frontend              | React.js, TypeScript, JavaScript, Next.js, React Native, React Router, HTML5, CSS3                      |
| State & Data          | Redux Toolkit, Redux, React Query, Context API                                                          |
| Architecture & Build  | Micro Frontends, Module Federation, Webpack, Vite                                                       |
| UI & Styling          | Material UI, Tailwind CSS, Bootstrap, Chart.js                                                          |
| Forms & Testing       | React Hook Form, Jest, Vitest, React Testing Library                                                    |
| APIs & Backend        | REST APIs, GraphQL, Axios, Fetch API, Swagger, Node.js, Java, PostgreSQL, MySQL, dotCMS                 |
| Tools                 | Git, Postman, Figma, Chrome DevTools                                                                    |
| Engineering Practices | Performance Optimization, Responsive Design, Accessibility, Reusable Components, API Integration, Agile |
| AI/ML                 | Gemini, MedGemma                                                                                        |

## PROFESSIONAL EXPERIENCE

**Ratna Global Technologies** — Oct 2025 – Present

*Member of Technical Staff II*

**Ratna HealthPlex** — *Unified Healthcare Platform*

- Architected independently deployable microfrontends using Webpack Module Federation across three concurrent healthcare and AI-testing products.
- Owned frontend delivery for a multi-portal healthcare platform spanning Admin, Physician, Nurse, Patient, Pharmacy, and Laboratory portals, covering telemedicine, EMR, prescription, and laboratory workflows.
- Owned the Consent Management, DSAR, Breach Management, and Audit & Security modules, and integrated a MedGemma-powered image-review feature that flags findings for doctor follow-up.
- Collaborated with backend engineers on tenant-aware APIs supporting the platform's multi-tenant architecture.

**Dr. Basu Eyecare** — *Multi-Branch Clinic Platform*

- Onboarded a multi-branch clinic client with multiple specialty service lines onto the shared HealthPlex multi-tenant platform, integrating its existing MedGemma-powered eye-image review capability.
- Extended shared Front Office, Doctor Consultation, Lead Management CRM, Pharmacy, and Admin modules for the new tenant, including Reports, Notifications, and Download Center capabilities.

**Ratna Test AI** — *AI-Powered Software Testing Platform*

- Built the frontend end-to-end for a Gemini-powered platform that automates test-case generation and supports full-cycle testing, defect tracking, and CI/CD-integrated release workflows.
- Integrated REST and GraphQL services in React.js and TypeScript to drive automated test-execution and defect-tracking interfaces.

## KEY CONTRIBUTIONS

- Reviewed pull requests, maintained Vite and Webpack build tooling, and contributed Java-based backend changes while maintaining primary frontend ownership.

## **Techmojo Solutions** — Dec 2023 – Mar 2025

*Member of Technical Staff*

### **DDRL** — *Real Estate Marketplace App*

- Built a cross-platform property-search application integrating Google Maps and real-time chat between buyers and agents, in React Native and Firebase.
- Partnered with the engineering team on UI requirements and design reviews throughout development.

### **PPBET** — *Multi-Brand Betting Platform*

- Delivered a multi-brand sports-betting and casino platform implementing real-time odds updates and personalized notifications across brands, in React.js, Next.js, and dotCMS.
- Built a shared, reusable component library used across multiple brand experiences, and debugged and stabilized application code across releases.

## **Protonshub Technologies** — May 2022 – Feb 2023

*React JS Developer*

### **Marketing Management** — *CRM Platform*

- Owned frontend development on a client-facing CRM platform for managing clients, calls, meetings, and tasks, in React.js, Redux, TypeScript, and Material UI.
- Covered core workflows with Jest test suites to guard against regressions.

## **Tanama Software Pvt Ltd** — Mar 2020 – May 2022

*React JS Developer*

### **Tech Passport** — *Skills-Tracking Platform*

- Built a skills-tracking platform giving students test-based performance feedback and admins tools to manage trainers, training plans, and assessments, in React and Node.js.

### **Dental App** — *Clinic Appointment Platform*

- Delivered a Dental App enabling online appointment booking, doctor assignment, and patient communication, in React and TypeScript, establishing initial frontend architecture and UI patterns as requirements evolved.

## **EDUCATION**

---

**B.Tech, Electrical & Electronics Engineering (EEE)** — JB Institute of Engineering and Technology (2015 – 2018)

**Diploma** — JN Government Polytechnic (2012 – 2015)
